TCARM2	Tablou Aparate Radiografie Mobila 2 Mobile radiography devices switchboard 2		

NOTA:  
Cabluurile electrice ce alimenteaza consumatorii normali vor fi de tip NHXX (de cupru cu intarziere marita la propagarea flacarii si fara degajari de halogeni).  
Cabluurile electrice ce alimenteaza consumatorii vitali cu rol de securitate la incendiu vor fi de tip NHXH (de cupru, rezistente la foc si fara degajari de halogeni).

NOTA:  
The electrical cables that supply normal consumers will be of the NHXX type (copper with increased delay in flame propagation and without halogen emissions).  
The electrical cables that supply vital consumers with a fire safety role will be of the NHXH type (copper, fire resistant and without halogen emissions).

Rețea alimentată din UPS-urile medicale, sistemul IT medical folosit pentru alimentarea consumatorilor finali conform schemelor monoalimantare IE089, IE090, IE091.

Network powered by medical UPS, medical IT system used to supply and consumers according to monofeeder schemes IE089, IE090, IE091.
